PROMPT AND PIXEL

EVENT OVERVIEW

Prompt and Pixel is an AI-assisted Web Design & Landing Page Development Competition designed to test participants' creativity, UI/UX design skills, frontend development ability, prompt engineering skills, and effective use of AI tools.
Participants will receive a common theme or problem statement at the beginning of the competition and will be required to conceptualize, design, and develop a responsive landing page within the allotted time. Prompt_and_Pixel
The competition will be conducted offline and will be played individually.

OBJECTIVE

Participants are expected to create a visually appealing, functional, and responsive landing page that effectively addresses the given theme or problem statement.
The competition focuses on:

- Creativity and originality
- UI/UX design
- Frontend development
- Prompt engineering

PARTICIPATION & REGISTRATION

Participation

- The competition is individual.
- Team participation is not allowed.
- The competition will be conducted offline at the designated venue.

Registration

Participants must:

1. Register for Prompt and Pixel through Unstop and Registration Fee: ₹50 per participant.
2. Join the official WhatsApp group after registration.
3. Follow the official WhatsApp group for important announcements and instructions.
4. Report to the venue at the specified time.

Only registered participants will be allowed to participate.

COMPETITION STRUCTURE

The competition will consist of three stages.

STAGE 1 — THEME ANNOUNCEMENT & PLANNING

At the beginning of the competition, a common theme or problem statement will be announced to all participants.

Participants will:

- Understand the given theme and target audience.
- Plan the layout and user experience.
- Decide the visual style, color palette, and typography.
- Plan their approach to using AI tools.

STAGE 2 — LANDING PAGE DEVELOPMENT

Participants will design and develop their landing page within the allotted competition time.

Participants may use:

- AI chatbots and coding assistants
- AI website/UI generation tools
- Frontend frameworks
- Animation libraries
- Design tools
- Open-source libraries and assets

The landing page should include, where appropriate:

- Responsive layout
- Attractive visual design
- Clear information hierarchy
- Interactive elements
- Smooth animations and transitions
- Intuitive navigation
- Consistent branding and typography

STAGE 3 — FINAL SUBMISSION & JUDGING

At the end of the development period, participants must submit their completed project according to the submission procedure announced by the organizers.
There will be no presentation or pitching round.
The submitted projects will be evaluated directly by the judging panel.

AI TOOLS & MODELS

AI tools are an important part of Prompt and Pixel and are allowed during the competition.
Participants may use AI for:

- Ideation
- UI/UX design
- Code generation
- Content creation
- Image generation
- Animations
- Debugging
- Other development-related tasks

AI Model Policy
The specific AI tools/models permitted for the competition, along with whether free or premium versions are to be used, will be announced by the organizers at the beginning of the event.
Participants must follow the AI tool and model instructions announced during the competition.
Participants should not assume that any particular AI model, platform, or premium subscription will be required unless explicitly announced by the organizers.

RULES & REGULATIONS

- The competition is individual; participants cannot work in teams.
- The competition will be conducted offline at the designated venue.
- A common theme/problem statement will be provided at the beginning of the competition.
- The landing page must be developed within the allotted competition time.
- AI tools are allowed and encouraged, subject to the AI rules announced by the organizers.
- Participants must create their solution during the competition.
- Previously completed websites or complete pre-built solutions must not be submitted.
- Open-source libraries and assets may be used as permitted by the organizers.
- Participants must follow all instructions provided by the organizers during the event.
- Copying or substantially reproducing another participant's work will result in disqualification.
- Participants are responsible for ensuring that their submitted project is functional.
- Late submissions will not be considered.
- The judges' decision will be final and binding.

FINAL SUBMISSION

At the end of the competition, participants must submit their completed project through the submission method specified by the organizers at the venue.
Participants may be required to provide:

- Participant details
- Completed project files
- Source code/project folder
- AI tools/models used
- 1–2 important prompts used during development
- A short description of the solution

The exact submission procedure and submission format will be announced by the organizers before the competition begins.
Participants must ensure that their submitted project is accessible and ready for evaluation.

JUDGING PROCESS

There will be no presentation round.
After the submission deadline:

1. The organizers will collect the submitted projects.
2. Judges will evaluate each landing page using the official judging criteria.
3. The website will be checked for functionality.
4. The website will be checked on desktop and mobile views.
5. AI usage and submitted prompts will be considered.
6. Each participant will receive a score out of 100.

JUDGING CRITERIA

The competition will be evaluated out of 100 marks.

Criteria	Marks
Creativity & Originality	25
UI/UX & Visual Design	25
Functionality & Frontend	20
AI Usage & Prompt Engineering	15
Responsiveness	15
TOTAL	100
