ROBO SOCCER

Where Robotics Meets the Spirit of Football!

Introduction

Robo Soccer is a two-round robotics competition where teams design, build and control their own robots to play a fast-paced football match. Use your robot's speed, strength, precision and strategy to outplay the opponent and score the maximum number of goals.

Teams of two to four members each design, assemble and tune a remote-controlled football robot, so the contest tests mechanical design, electronics, control and teamwork.

Event Description

Participants must build a robust robot that can move across the arena, control the ball, defend its goal and attack the opponent. Every match demands a perfect combination of mechanical design, electronics, control systems, teamwork and strategy.

The qualifiers and the final matches will be played physically on the Institute campus.

Event Format

ROUND 1 — QUALIFYING ROUND

- Each team will consist of 2 to 4 members (team leader included).
- Every robot goes through technical inspection before its first match.
- Teams are divided into groups and play round-robin matches within the group. If more than 16 teams register, only the top 16 teams will be shortlisted after robot inspection.
- Winners and top-scoring teams of each group qualify for Round 2.

ROUND 2 — KNOCKOUT ROUND

- Qualified teams play single-elimination matches: quarterfinals, then semifinals.
- The two semifinal winners play the final match to decide the 1st and 2nd positions.
- Each match is played for 5 minutes. If the score is tied, a 2 minutes golden-goal period is played, then a penalty shoot-out or a rematch.

REGISTRATION FEE

- ₹50 per member.

ARENA AND ROBOT SPECIFICATION

ARENA SPECIFICATION

- The matches are played in a marked football arena with two goals and a ball, shown to the teams before the event.

ROBOT SPECIFICATION RULE

- The robot must be wired or wireless remote-controlled by the team. Autonomous robots are not allowed unless announced.
- Maximum robot size: 30 cm x 30 cm x 30 cm and maximum weight: 5 kg.
- Maximum operating voltage: 12 V. Batteries must be sealed and safe.
- Pyrotechnic, liquid-based or otherwise hazardous parts are strictly prohibited.
- Each team must bring a spare battery and basic tools. The organisers will not provide components.

FAIR-PLAY AND ROBOT RULES

1. Only one team member may operate the robot during a match. Other members must stay outside the arena.
2. A goal is counted only when the whole ball crosses the goal line.
3. Robots must not hold, lift or trap the ball for more than 5 seconds.
4. Intentionally damaging, flipping or trapping the opponent's robot is a foul. Repeated fouls lead to a warning, a goal penalty and then disqualification.
5. A robot that is immobilised for more than 10 seconds is declared out of play and the referee may restart the match.
6. A team that is not ready within 3 minutes of being called forfeits the match.
7. Jammers, signal interference or any unfair electronic or mechanical method lead to immediate disqualification.
8. The decision of the referees and the organizing committee regarding scoring, penalties and disqualification is final and binding. The organizers may modify or clarify the rules for fair conduct, and any change will be announced before implementation.

FINAL RANKING

Round 1 determines qualification through the group matches. Round 2 determines the final ranking through the knockout matches and the final.
