OFFICIAL EVENT RULEBOOK

THE SEISMIC ARENA

Build tall. Build smart. Survive the shake.

PART OF ADDOVEDI 2026

PRIZE POOL	TEAM SIZE	TYPE
₹8,000 cash	**Up to 3 members**	**Tower model engineering**

Date, venue and schedule: to be announced

01 Event at a Glance

Item	Details
Event	The Seismic Arena
Type	Tower model engineering
Team size	Maximum 3 members
Format	Looks Test, Stability Test, Strength Test
Registration fee	₹50 per member (₹50 for 1 · ₹100 for 2 · ₹150 for 3)
Prize pool	₹8,000 cash (total worth ₹17,000 including goodies)
Date	To be announced
Venue	To be announced

Items marked To be announced are not yet confirmed. The organisers will announce them before the event.

02 The Seismic Arena

Build tall. Build smart. Survive the shake.

Introduction

The Seismic Arena is a premier structural engineering challenge in which participants design and build a tower model capable of withstanding physical evaluation and structural testing. The event tests essential engineering principles including stability, stiffness, bracing, damping, center of mass, and sound construction techniques.

Problem statement

Participants must design and fabricate a model tower structure that first passes a visual quality inspection ("looks test"). Following the inspection, the tower will undergo a stability test where a container is mounted on top to measure water dispersion during movement, and finally a strength test where it must successfully carry an external load.

Permitted materials

A structure may only be built from the following 5 materials:

- Popsicle sticks
- Fevi Quick
- Toothpicks
- Thermocol
- Fevicol

Event structure

Round 1 – Design and Presentation (Looks Test)

- Every structure will be visually inspected and evaluated by judges.
- Marks are awarded for structural concept, quality of construction, effective use of bracing, joint neatness, and aesthetic presentation.

Round 2 – Stability Test (Water on Top)

- A water-filled container will be positioned at the top of the structure.
- The tower is subjected to motion to evaluate overall balance, damping, and how much water is dispersed.

Round 3 – Strength Test (External Load)

- The structure is tested under incremental external load applied at the top platform.
- The test assesses load-bearing capacity and the ultimate structural failure limit.

Structure specification

Item	Requirement
Building type	Tower-type building capable of carrying a payload / container at the top platform.
Construction limit	The main frame must be built strictly using popsicle sticks and toothpicks only, bonded with permitted adhesives.
Minimum height	30 cm, measured from the base to the top platform.
Base plate	The base must be made of thermocol, with any base dimensions the team desires.

Event rules

Construction

- Only the 5 permitted materials may be used; thermocol is allowed for the base plate only.
- Teams must bring their own permitted materials and supplies. Organizers will not provide tools or building materials at the venue.

Submission

- Structures must be submitted at the registration desk prior to the stated deadline on event day.
- Each model will be tagged with a team ID.

Time limits

- Each team is allotted a continuous 5-minute window at the testing station for setup and testing.

Authenticity

- All designs and submissions are checked for originality. Plagiarism or fraudulent construction methods will cause immediate disqualification.

General rules

- Each team may consist of a maximum of three members.
- A team may register only once. Multiple registrations will result in only the first entry being considered.
- Only undergraduate and graduate students from recognized academic institutions are eligible to participate.
- Participants must carry valid student ID cards.
- Teams must bring their own permitted materials and supplies. Organizers will not provide tools or building materials at the venue.
- All designs and submissions are checked for originality. Plagiarism or fraudulent construction methods will cause immediate disqualification.

Team specifications and conduct

- Teams are strictly forbidden from touching or tampering with another team's structure or testing equipment.
- In case of any discrepancy or dispute, the final ruling rests entirely with the organizing panel and judges.
- Organizers reserve the right to modify rules if necessary; changes will be communicated to registered teams promptly.

Prizes

Prize pool: ₹8,000 in cash, with total prize worth ₹17,000 including goodies.

03 Rules for Every Event

These rules apply to every ADDOVEDI 2026 event. The event rules in the previous section add to them.

- Follow all instructions from organisers, volunteers, coordinators and judges.
- Arrive on time. Late arrivals may lose build or round time.
- Plagiarism, copying or fraudulent methods are not allowed and lead to disqualification.
- Teams must keep to the spirit of healthy competition. They must not touch, damage or tamper with another team's work or equipment.
- Judges and organisers may disqualify any team involved in misconduct.
- In case of any dispute or discrepancy, the decision of the organisers and judges is final and binding.
- Organisers may modify any rule when needed. Changes will be communicated to registered participants.
- Eligibility, team size and registration details can differ by event. Check the event rules.

Registration fee

Team size	Fee per team (₹50 per member)
Up to 2 members	₹50 per member
3 members	₹150
4 members (only where an event allows it)	₹200
