ADDOVEDI 2026 • Theme: Enter the Arena

1. Event Overview

Solid Siege is the SolidWorks CAD competition of ADDOVEDI 2026, the annual technical fest of NIT Arunachal Pradesh, organised by the Mechanical Engineering Student's Society (MESS). Across three progressively harder rounds (2D sketching, 3D part modelling and assembly design), participants race the clock to turn engineering drawings into accurate, clean SolidWorks models.

A design problem with exact dimensions and required features is released at the start of each round. Participants must model it exactly as specified within the time limit to qualify for the next round.

WHAT THE COMPETITION TESTS

AREA	WHAT PARTICIPANTS DEMONSTRATE
2D sketching	Correct geometry and a clean, well-constrained sketch
3D part modelling	Correct features and a clean model tree
Assembly design	Correct components, proper mates and overall assembly accuracy
Dimensional accuracy	Modelling exactly to the dimensions given in the problem statement
Speed	Completing each model correctly within the time limit

2. Participation and Registration

3	10
ROUNDS	MAXIMUM POINTS

2.1 A participant may register only once. In case of multiple registrations, only the first will be considered.

2.2 Participants must provide valid and accurate registration details.

2.3 Participants must carry a valid student ID card from their respective institution.

2.4 Participants must report according to the schedule announced by the organisers.

3. Event Format

Solid Siege is a progressive, three-round SolidWorks challenge. All participants begin with Round 1, and only those who qualify a round within its allotted time advance to the next. Final ranking is based on total score; time is used only to break a tie.

ROUND	TASK	POINTS
Round 1	2D Mechanical Bracket (2D sketching)	**2**
Round 2	3D Stepped Support (3D part modelling)	**3**
Round 3	Wheel–Shaft Assembly (assembly modelling)	**5**
Total		**10**

4. Event Structure

1

ROUND 1 — 2D MECHANICAL BRACKET

2D sketching round

Complete the 2D design exactly as specified in the problem statement. Focus: dimensional accuracy, correct geometry and a clean, well-constrained sketch.

2

ROUND 2 — 3D STEPPED SUPPORT

3D part modelling round

Complete the 3D part exactly as specified in the problem statement. Focus: dimensional accuracy, correct features and a clean model tree.

3

ROUND 3 — WHEEL–SHAFT ASSEMBLY

Assembly modelling round

Model the components and assemble them exactly as specified. Focus: correct components, proper mates and overall assembly accuracy.

5. Qualification and Progression

5.1 All participants begin with Round 1.

5.2 Only participants who qualify Round 1 within the given time advance to Round 2.

5.3 Only participants who qualify Round 2 within the given time advance to Round 3.

5.4 Round-wise weightage: Round 1 = 2 points, Round 2 = 3 points, Round 3 = 5 points. Maximum possible score = 10.

6. Time and Submission

6.1 Each round has a fixed time limit, announced before the round begins.

6.2 Exact dimensions and required features are provided at the start of each round.

6.3 Submissions after the time limit will not be accepted unless the coordinator announces otherwise.

6.4 Submit files in the format and location announced by the coordinators.

6.5 Official start and submission times recorded by the coordinators will be used for all timing decisions.

7. Evaluation and Scoring

Evaluation may consider dimensional accuracy, feature correctness, constraints, modelling quality and completion.

ROUND	CRITERIA (MARKS)	TOTAL
Round 1 · 2D	Geometry & dimensions (1.0) + Constraints / clean sketch (1.0)	**2**
Round 2 · 3D	Geometry / dimensions (1.5) + Features / model tree (1.0) + Finish (0.5)	**3**
Round 3 · Assembly	Components (1.5) + Mates (1.5) + Assembly accuracy (1.5) + Finish (0.5)	**5**
Total		**10**

The judges may finalise the detailed judging checklist before the event.

8. Final Ranking and Tie-Break

Final ranking is based on total score. If participants have equal scores, their recorded times are compared in the order below. The faster participant gets priority at the first round where the times differ.

COMPARE FIRST **Round 3 time** → COMPARE NEXT **Round 2 time** → COMPARE NEXT **Round 1 time**

9. Fair-Play and General Rules

9.1 Unauthorised external help, pre-made models or any other unfair means will lead to disqualification.

9.2 Participants must maintain proper conduct and must not interfere with other participants, their systems or their files.

9.3 Participants must follow the instructions of the coordinators throughout the event.

9.4 The organisers reserve the right to modify or clarify the rules if required. Any change will be announced to all participants before implementation.

10. Disqualification

A participant may be disqualified for any of the following:

10.1 Using unauthorised external help.

10.2 Using pre-made models or files.

10.3 Using any other unfair means.

10.4 Interfering with other participants, their systems or their files.

10.5 Misconduct during the event.

11. Prize Pool

Prize Value: ₹10,00,000+ (10 Lakh+ in prizes)

Position-wise prize distribution will be announced by the organisers.

12. Final Authority

12.1 The decision of the judges / organising committee regarding qualification, scoring and disqualification will be final and binding.

12.2 Any situation not explicitly covered in this rulebook will be decided by the organising committee.

12.3 Any rule modification will be communicated to participants before implementation.
