₹10 LAKH+
PRIZE POOL

Introduction

Solid Siege is the SolidWorks CAD competition of Addovedi 2026, the annual technical fest of NIT Arunachal Pradesh. Across three progressively harder rounds — 2D sketching, 3D part modelling and assembly design — participants race the clock to turn engineering drawings into accurate, clean SolidWorks models.

Event Description

A design problem with exact dimensions and required features is released at the start of each round. Model it exactly as specified within the time limit to qualify for the next round. Round scores build from 2 to 3 to 5 points, for a maximum of 10, and recorded time decides any tie.

Event Format

Solid Siege is a progressive, three-round SolidWorks challenge. All participants begin with Round 1, and only those who qualify a round within its allotted time advance to the next. Final ranking is based on total score; time is used only to break a tie.

ROUNDS	MAXIMUM POINTS	PRIZE POOL

Event Structure

1 ROUND 1 — 2D MECHANICAL BRACKET

2 POINTS

2D sketching round

Complete the 2D design exactly as specified in the problem statement. Focus: dimensional accuracy, correct geometry and a clean, well-constrained sketch.

2 ROUND 2 — 3D STEPPED SUPPORT

3 POINTS

3D part modelling round

Complete the 3D part exactly as specified in the problem statement. Focus: dimensional accuracy, correct features and a clean model tree.

3 ROUND 3 — WHEEL–SHAFT ASSEMBLY

5 POINTS

Assembly modelling round

Model the components and assemble them exactly as specified. Focus: correct components, proper mates and overall assembly accuracy.

Contest Rules

QUALIFICATION & SCORING

- All participants begin with Round 1.
- Only participants who qualify Round 1 within the given time advance to Round 2; only those who qualify Round 2 advance to Round 3.
- Round-wise weightage: Round 1 = 2, Round 2 = 3, Round 3 = 5. Maximum possible score = 10.

TIME & SUBMISSION

- Each round has a fixed time limit, announced before the round begins.
- Exact dimensions and required features are provided at the start of each round.
- Submissions after the time limit will not be accepted unless the coordinator announces otherwise.
- Submit files in the format and location announced by the coordinators.

EVALUATION

Evaluation may consider dimensional accuracy, feature correctness, constraints, modelling quality and completion.

ROUND	CRITERIA (MARKS)	TOTAL
Round 1 · 2D	Geometry & dimensions (1.0) + Constraints / clean sketch (1.0)	**2**
Round 2 · 3D	Geometry / dimensions (1.5) + Features / model tree (1.0) + Finish (0.5)	**3**
Round 3 · Assembly	Components (1.5) + Mates (1.5) + Assembly accuracy (1.5) + Finish (0.5)	**5**

The judges may finalise the detailed judging checklist before the event.

Fair-Play and General Rules

1. Unauthorised external help, pre-made models or any other unfair means will lead to disqualification.
2. Participants must carry a valid student ID card from their respective institution.
3. A participant may register only once. In case of multiple registrations, only the first will be considered.
4. Official start and submission times recorded by the coordinators will be used for all timing decisions.
5. Participants must maintain proper conduct and must not interfere with other participants, their systems or their files.
6. The decision of the judges / organising committee regarding qualification, scoring and disqualification will be final and binding.
7. The organisers reserve the right to modify or clarify the rules if required. Any change will be announced to all participants before implementation.

Final Ranking & Tie-Break

Final ranking is based on total score. If participants have equal scores, their recorded times are compared in the order below — the faster participant gets priority at the first round where the times differ.
